Education and Research Experience

Peking University Sep 2023 - Present
B.S. student in Intelligent Science and Technology
B.B.A. student in Innovation and Entrepreneurship Management

Stanford University June 2026 - Present
Research Intern through UGVR
Advisor: Prof. Leonidas Guibas

University of California, Berkeley Jan 2026 - May 2026
Visiting Student through BGA
Advisor: Prof. Masayoshi Tomizuka, Prof. Dhruv Shah

Galbot AI Co., Ltd. Feb 2025 - Feb 2026
Research Intern, Department of Large Models.
Advisor: Prof. He Wang

Selected Publications

[1] TANGO: Humanoid Navigation in Cluttered Environments with a Whole-Body Vision-Language-Action Model *(RSS 2026 @ WCBM **Oral**, in submission)*
Anqi Li*, Yuxin Chen*, Zhaobo Li*, Zhuo Cao*, Junli Ren, Masayoshi Tomizuka, Dhruv Shah†

- The first **whole-body vision-language navigation** framework featuring 29 DoF joint-space planning, human-like whole-body navigation behavior, and generalizable spatial understanding.

[2] UrbanVLA: A Vision-Language-Action Model for Urban Micromobility *(ICRA 2026)*
Anqi Li*, Zhiyong Wang*, Jiazhao Zhang*, Minghan Li, Yunpeng Qi, Zhibo Chen, Zhizheng Zhang†, He Wang†.

- Enables scalable and generalizable **long-horizon urban navigation** in the wild. Double-stage post-training ensures safety and alignment with social norms.

[3] Embodied Navigation Foundation Model *(ICLR 2026)*
Jiazhao Zhang*, **Anqi Li***, Yunpeng Qi*, Minghan Li*, Jiahang Liu, Shaoan Wang, Haoran Liu, Gengze Zhou, Yuze Wu, Xingxing Li, Yuxin Fan, Wenjun Li, Zhibo Chen, Fei Gao, Qi Wu, Zhizheng Zhang†, He Wang†.

- A **navigation foundation model** trained on 1.2 billion samples, unifying the embodiments of quadrupeds, drones, wheeled robots, and vehicles, and spanning tasks including VLN, ObjectNav, tracking, and self-driving.

Additional Publications

[4] TrackVLA: Embodied Visual Tracking in the Wild *(CoRL 2025)*
Shaoan Wang*, Jiazhao Zhang*, Minghan Li, Jiahang Liu, **Anqi Li**, Kui Wu, Fangwei Zhong, Junzhi Yu, Zhizheng Zhang†, He Wang†.

- Simultaneously conducting **object recognition** and **visual tracking**, TrackVLA demonstrates robust tracking, long-horizon tracking and cross-domain generalization.

[5] SPAN-Nav: Generalized Spatial Awareness for Embodied Navigation *(In submission)*
Jiahang Liu*, Tianyu Xu*, Jiawei Chen*, Lu Yue*, Jiazhao Zhang*, Zhiyong Wang*, Minghan Li, Qisheng Zhao, **Anqi Li**, Qi Su, Zhizheng Zhang†, He Wang†.

- An end-to-end VLA framework with universal **spatial awareness**, through zero-shot sim-to-real 3D occupancy prediction, to facilitate path planning for diversified navigation tasks.

Awards, Skills and Interests

Awards:

- First Prize in Academic Rising Star. ***Top 5 college-wide*** (2026)

Technical Skills:

Robot Platforms: Unitree G1, Unitree Go2
Programming: Python, PyTorch, C/C++, LaTeX, Isaac Sim, Mujoco
Languages: English (TOEFL: 111), Chinese (Native)

Research Interests:

My long-term research goal is towards building robotic systems that operate reliably in complex, human-centered environment. Currently, my focus is mainly on **embodied navigation**, **whole-body control** and **agentic robotics**. In the future, I hope to extend these ideas toward a more unified framework of human-centered robotic intelligence that seamlessly integrates high level perception, planning, and low level action.
